Professor Stephen Scott CBE

Place2Be Staff

Jacqueline Cassidy, Regional Director Scotland
Niki Cooper, Clinical Director
Cecilia Corbetta, Regional Clinical Lead London and West
Alistair Crawford, Interim Director of Learning and Practice
Sarah Golden, Head of Evaluation
William Guri, Regional Clinical Lead London and South
Nikhil Naag, Data Manager
Catherine Roche, Chief Executive Officer
Rebecca Salter, Data and Insight Officer
Dr Kati Toth, Senior Data Analyst
Jemma White, Evaluation Manager
Sarah Williams-Robbins, Director of Marketing and Communications

Professor Robin Banerjee

Professor Robin Banerjee is Head of the School of Psychology and a professor of developmental psychology at the University of Sussex. He leads the CRESS (Children's Relationships, Emotions, and Social Skills) research lab, and he works closely with practitioners and policymakers in the areas of education and mental health. A core applied focus of the CRESS lab is the development and evaluation of school-based strategies to support young people's social and emotional functioning.

Professor Tamsin Ford, CBE

Tamsin Ford is Professor of Child and Adolescent Psychiatry at the University of Cambridge. She completed her clinical training at the Bethlem and Maudsley Hospitals and her PhD at the Institute of Psychiatry, King's College London. She moved to Exeter University Medical School in 2007 and to Cambridge in 2019. Her research focuses on the effectiveness of services and interventions to support the mental health of children and young people. Her work has an increasing focus on schools and education, and includes the patterns of service use, service organisation, the accurate identification of psychopathology and the generation or synthesis of evidence for interventions directly with families or indirectly through practitioners working with children. The important interface between mental health and education is her particular focus of interest.

Professor Ian Goodyer

Ian Goodyer is a Child and Adolescent Psychiatrist based at Cambridge University pursuing research into the connections between human development and youth psychopathology. His studies are centred on adolescents in the community as well as current patients. The research programme explores the influences of the early environment on adolescent brain structure, cognition and social development and he has led on randomised controlled trials to evolve new brief psychological therapies for adolescents with depression and conduct disorders for use in clinics and in community settings.

Elizabeth (Liz) M Greetham

Over the last 30 years, Elizabeth has analysed and invested in pharmaceutical and biotechnology companies in the United States, Europe and Japan. Her primary focus has been on assessing clinical trials of products under development across all therapeutic categories, the probability of their success and potential commercial viability. In this capacity she has worked closely with senior commercial, research and executive managements around the world as well as academic and regulatory scientists. Between 1999 and 2004, Elizabeth was CEO and Board Member of DrugAbuse Science, a private biopharmaceutical company, dedicated to developing prescription medications to treat alcoholism and heroin and cocaine addiction. She has also sat on seven publicly quoted US Pharmaceutical and Biotechnology Company boards.

Gregor Henderson

Gregor is a leading international expert on public mental health and wellbeing, with over 20 years' experience of national and international mental health and wellbeing policy development and delivery. Gregor was until recently Public Health England's Director of Mental Health. A role he held for 8 years leading on key strategic, operational and public facing programmes. Gregor has held a variety of roles across the UK, and has worked with a range of Government Departments and Ministries in the UK and Internationally. Gregor now works independently for a range of organisations in mental health and wellbeing, children's mental health and community wellbeing. Including Charing the Place2Be's Research Advisory Group. Gregor is a published author and a well known conference speaker. Motivated by finding modern solutions to mental health issues and to increasing the understanding of what works, for whom and how in ways that support seeing mental health as part of everyday human experience and development.

Professor Neil Humphrey

Neil Humphrey is the Sarah Fielden Chair in Psychology of Education at the Manchester Institute of Education, University of Manchester, UK. His research interests include children's mental health, social and emotional learning, and special educational needs. When he is not working at the University, Neil moonlights as an unpaid taxi driver for his three daughters.

Dr John Ivens

John is the executive head teacher of the Bethlem & Maudsley Hospital School and is an acting principal educational psychologist. He is a professional adviser, on quality and research issues, to the children's counselling charity Place2Be. Alongside these professional roles John's research interests include: developing on-line and individually administered children's well-being measures (happiness and the social experience of school); the effects of being bullied on children's well-being; children's drawings; exploring the effectiveness of applied behaviour analysis in the education of autistic pupils, and the prediction of successful pupil reintegration into mainstream education and training.

Professor Edward Melhuish

Edward Melhuish is Professor of Human Development at Birkbeck, University of London and Research Professor at the University of Oxford. He is also a Principal Investigator on the Effective Provision of Pre-school Education (EPPE) in England and Northern Ireland and Executive Director of the National Evaluation of Sure Start. Professor Melhuish is an internationally recognised expert in the study of child development and childcare and has extensive experience with longitudinal studies. He was a Principal Investigator of studies of day care and family life in the 1980s, which had considerable influence on sections of the 1989 Children Act. He has also conducted research on child development, parenting and childcare in several European countries, on behalf of the European Commission.

Dr Margaret Murphy

Margaret currently works as a Clinical Adviser at the Anna Freud Centre; as a tutor on the University of Cambridge medical undergraduate course and as a Medical Member of the Mental Health Tribunal and as a Specialist Adviser at the Care Quality Commission. Most of Margaret's career until recently has been spent working directly with children, young people and their families and this is the aspect of work which she finds most inspiring and rewarding.

Margaret qualified as a medical doctor in 1986 and then trained as a psychiatrist specialising in child and adolescent psychiatry. Margaret additionally carried out research including a study of the genetics of autism. She led the East of England training programme for doctors specialising in child and adolescent psychiatry. Margaret was the Chair of the Faculty of Child and Adolescent Psychiatry for the Royal College of Psychiatrists 2009-2013 and worked for the Care Quality Commission as the National Professional Adviser in Child and Adolescent Mental Health 2014-2018. She chaired the NHS England Secure and Specialised Mental Health Programme 2012-2018.

Margaret has been involved in lobbying for improvements in children's services and in developing health policy including setting up and co-chairing the Future in Mind Taskforce in 2014 which led to increased investment in child and adolescent mental health services in England.

Professor Stephen Scott CBE

Stephen Scott CBE, Professor of Child Health and Behaviour at the Institute of Psychiatry (IoP), King's College is Director of the National Academy for Parenting Research (NAPR), based at the IoP at King's, where he leads a team of psychologists, clinicians and researchers investigating how best to improve parenting in order to enhance child outcomes. His research interests include conduct disorder and antisocial behaviour, parenting interventions, attachment, adoption and fostering. He has led three randomised controlled trials on the effectiveness of parent

training in practice, including a trial of Fostering Changes, a British programme for foster carers; the Helping Children Achieve trial, comparing the impact of relationship improvement programmes and helping parents of 5-6 year olds read with their child; and a trial of Functional Family Therapy for serious teenage antisocial behaviour and delinquency. He has also led the development of a new programme for parents with high needs, and economic evaluations on the cost effectiveness of parenting intervention programmes. Professor Scott is also Consultant Child and Adolescent Psychiatrist in the CAMHS Adoption and Fostering Service and the Conduct Problems Service at the South London and Maudsley NHS Foundation Trust (SLaM).

Dr David Trickey

David currently works as a Consultant Clinical Psychologist in the Trauma and Maltreatment Service at the Anna Freud Centre, London (AFC). He is part of the staff team running the Improving Access to Psychological Therapies (IAPT) courses for Children and Young People.

David has extensive clinical experience working with children and families, and since 2000 he has specialised in working with traumatised and traumatically bereaved children and young people. He worked for 6 years at the Traumatic Stress Clinic in North London as it became part of Great Ormond Street Hospital. He was then Lead Consultant Clinical Psychologist at Leicester Royal Infirmary Children's Hospital and then Lead Consultant Clinical Psychologist at an innovative service for traumatically bereaved children and young people in Luton and Bedfordshire.

David acts as an Expert Witness or Advisor for the Courts, the Police and other organisations in relation to trauma and bereavement. He has particular expertise and experience of working with children who have witnessed one parent killing another. He has been consulted following critical incidents to inform the crisis response and was commissioned by Government to evaluate the Humanitarian Assistance Centre established in response to the London terrorist attacks on 7th July 2005.

David also supervises doctoral research relating to trauma and traumatic bereavement; he has published various research articles, including a meta-analysis of risk factors for PTSD in children and has contributed to a number of textbooks. **Online Resources / Further Reading:** <http://davidtrickey.com>

Mark Ungless

Mark Ungless is Director of Data Insights at Mental Health Innovations, the charity behind Shout 85258, the UK's first free, 24/7, confidential text support service for anyone who is struggling to cope. He has over 20 years of experience conducting research in the fields of psychology and neuroscience, with a focus on the neural systems involved in learning, memory, and motivation. Before joining Mental Health Innovations, Mark was Senior Lecturer in Neuroscience and Director of Postgraduate Studies at the MRC London Institute of Medical Sciences at Imperial College London, during which time he was also Education & Engagement Secretary for the British Neuroscience Association. Prior to that he held a lectureship and then a Royal Society University Research Fellowship at the University of Oxford, following postdoctoral research training in Houston, San Francisco, and Oxford. Mark has a BSc and DPhil in Experimental Psychology and is a Senior Fellow of the Higher Education Academy.
